

Walter Sujansky, MD PhD

735 Industrial Ave., Suite 216 San Carlos, CA 94070
(650) 802-8731 walter@sujansky.com

Summary

- A seasoned health I.T. professional with a medical degree, medical informatics training, and 25 years of industry experience designing, building, and operating healthcare software applications.
- A track record of driving product development at start-up companies, as well as consulting to large H.I.T. vendors, provider organizations, venture funds, and government agencies.
- Interests include product management, software engineering, data analysis, health care policy, and intellectual property law.

Skills

- Product management, including all facets of product conceptualization, business modeling, requirements analysis, implementation, support, and life-cycle management.
- Medical informatics, including the modeling and analysis of clinical data in information systems.
- Clinical data standards, including HL7 v2 messages, C/CDA documents, Direct Secure Messaging, IHE frameworks for interoperability, and various terminology systems (ICD-10, SNOMED-CT, LOINC, RxNorm, NDC, etc.).
- Machine Learning, including linear regression, logistic regression, and neural networks.
- Modern technical environments and tools, including database management systems (MySQL, Oracle, SqlServer), programming languages (Java, C++, Perl, VBA), frameworks (Spring, AngularJS, Bootstrap), and web service interfaces (SOAP, REST, SAML, OAuth, etc.).
- Broad-based knowledge of the healthcare and health I.T. industries, including landscape of provider organizations, payers, ancillary service providers, I.T. vendors, and trade associations.
- Extensive knowledge of government policies that impact healthcare and health I.T., including HIPAA, Meaningful Use, CMS alternative payment models, electronic prescribing regulations, and CLIA laboratory requirements.

Work History

President and Senior Consultant **Sujansky & Associates, LLC** **2003 – Present**

- Leads a healthcare I.T. consulting practice that addresses the technical, business, and policy aspects of developing novel clinical software applications.
- Expertise in electronic health records, personal health records (mobile and cloud-based), disease registries, clinical data warehouses, clinical data interoperability and health information exchange.
- Services include requirements analysis, product/project management, data-architecture design, software development, technology and vendor evaluation, and strategic planning.

See www.sujansky.com for further information about key capabilities, significant past projects, and clientele. References available upon request.

Director, Product Development **ePocrates, Inc.** **2000 – 2003**

- Directed a team of product managers in the conceptualization, requirements analysis, and implementation oversight of products for managing drug-prescribing information on handheld devices.
- During tenure, the team successfully delivered a new formulary-publishing application, an updated version of the ePocrates drug-reference guide, a redesigned PDA-based messaging system, and a pilot implementation of an electronic prescribing tool.

- Responsibilities included product design (including UI design, data modeling, and terminology coding), competitive research, personnel management, and support for sales and business development activities.

Director, Commercial Products Apelon, Inc. 1999 – 2000

- Managed all facets of product development for the company’s non-government (commercial) market. Apelon’s products include terminology-management tools based on the Unified Medical Language System, as well as terminology-development tools based on description logic.
- Responsibilities included requirements analysis, product design, user-interface design, management of engineering staff, quality assurance, user documentation, and sales support.
- Also consulted to major customers (including the AMA and Kaiser Permanente). Engagements included the design of an enhanced model for the CPT-4 coding system.

Director, Clinical Data Engineering Oceania, Inc. 1997 – 1999

- Led a 6-person team responsible for the design and implementation of clinical data models used by an electronic health record system.
- Models included XML and SNOMED-CT representations of medical records to support reporting, decision support, and document interchange.

Clinical Data Engineer WiSE Medical Systems 1996 – 1997

- Designed clinical coding system for an ambulatory EHR.

Consultant Institute for Medical Informatics 1991 – 1994

- Designed terminology server and terminology model for an EHR rules engine.

Education

M.D., Ph.D. Stanford University, Stanford, CA 1996

- Earned M.D. and Ph.D. in Medical Information Sciences Program, a multidisciplinary graduate program combining research in computer science, decision theory, and biomedicine.
- Doctoral thesis defined a model for uniform access to heterogeneous clinical databases via the application of semantic data models and automated query-translation techniques.

B.A. Harvard College, Cambridge, MA 1986

- Earned B.A. in economics while minoring in pre-medical sciences. Graduated cum laude. Phi Beta Kappa, Junior year. Ski team, WHRB radio, Fox Club.

Activities and Honors

- Invited expert at Workshop on Exploring Legal Challenges to Fulfilling the Potential of mHealth in a Safe and Responsible Environment. American Association for the Advancement of Science (AAAS). October 6-7, 2014.
- Member of Advisory Panel to HHS Health Information Technology Policy Committee on the topic of disease registries as data intermediaries for clinical quality measures. 2013 – 2014.
- Member of Expert Panel for Lab Data Integration for Diabetes Care Improvement. Brookings Institution, November 2009.
- Member of Technical Expert Panel for the development of “Privacy and Security Solutions for Interoperable Health Information Exchange -- Perspectives on Patient Matching.” 2009.
- Judge, Electronic Medical Record Product Awards. Towards Electronic Patient Records (TEPR) Conference. 2003-2005.
- Engaged as an expert witness in several patent-infringement cases involving health information technology

Recent Speaking Engagements

- Health Information Exchange: Challenges and Methods. 3-hour education session, American Medical Informatics Association 2015 Annual Symposium. San Francisco, CA. November, 2015.
- A Lightweight, Decentralized Trust Framework for DIRECT Messaging. Educational session presented at Health Information and Management Systems Society (HIMSS) conference, 2014
- The Informatics of Health Information Exchange. 3-hour education session, American Medical Informatics Association 2012 Annual Symposium. Washington, D.C. November 3, 2012.
- Standards for Storing and Exchanging Clinical Data in Electronic Health Record Systems. 3-hour education session, American Medical Informatics Association 2010 Annual Symposium. Washington, D.C. November 13, 2010. Also presented this tutorial at the 2007, 2008 and 2009 Annual Symposia.
